Test Page

This is a test page from FAXtopia.

Note that plain text on white paper resolves best on faxes. Larger text is better. This is 14 point text.

Sending from a web based fax service to another web based fax service usually produces relatively clean faxes. Some old fax machines can produce lines and spots from their rollers.

Images do not usually resolve very clearly.

- We call faxes with lots of images 'dirty faxes' because in the old days they would make the rollers in the machine dirty.
